Quick Start Guide to Lineup Manager

Oct 18, 2026 · Jeffrey Haid

The fast path to running your first game in Lineup Manager — for the full walkthrough, see the New Coach Guide.

The essentials

1. **Accept your invite.** Open the email from your club admin and click the invite link. Create an account (or sign in) when prompted. The app lives at **lacrosselineupmanager.com** — bookmark it.
2. **Pick your club and team.** If you coach more than one team, choose the right one after signing in. If you belong to more than one club, your club's name at the top of the page becomes a switcher so you can hop between them later.
3. **Check your roster.** Your admin may have already added the roster — if not, add players from the Roster tab, or paste in a CSV.
4. **Put it on your phone.** Open **Getting started** (top of the page) for a one-tap install card. On iPhone, open the site in Safari, tap Share, then **Add to Home Screen**. On Android or Chrome, tap **Install app**. It then opens like any other app.

Before every game

1. Open the game from the Games tab, or schedule a new one and pick a **Format** — Field, Sixes, or Sevens (see the New Coach Guide for what each means).
2. On the right, set each player's availability — Available, Maybe, or Not Available.
3. On the left, build the lineup: pick a player for each slot. Only Available/Maybe players show up as choices. The slots shown automatically match the game's Format.
4. Anyone not in a starting slot appears on the Bench below the lineup.
5. Want substitutes? Flip the **Subs** switch under the word Lineup (Field and Sevens games). It adds 2 attack, 3 midfield and 2 defense sub spots for that game, and they print on the lineup sheet too.
6. Click Print lineup sheet to print or save a PDF copy for game day.

Playing a tournament?

1. On the Games tab, add the event under **Tournaments**, then pick it when you schedule each game.
2. Set availability once, then use **Copy availability from another game** (top of the availability list) on the other games. It only fills in players still at No Response.

Need a guest player?

1. On the game's page, click **+ Add guest** at the top of the availability list. Pick someone from your guest roster, or type a new guest's name (and number and position, if you like).
2. Guests stay off your main roster and show only on the games you add them to. They're saved so you can reuse them, and they appear in History under a "Guest players" divider. Click the ✕ next to a guest to take them off a game.

Heading to a field with weak signal?

1. The app keeps an **offline copy** of your team's upcoming games — lineups, bench and availability — on your phone. You'll see "Offline copy saved…" near the bottom of your team pages.
2. Before you leave home or the car, tap **Save now** next to it while you still have signal. With no signal, the app opens that saved copy automatically (read-only).

Practice plans (if your club has them)

1. A **Practices** tab appears on your team if your club has the practice plans feature. Don’t see it? Ask your club admin — it’s turned on per club.
2. Create a plan with a title, date, goals and a list of drills with minutes. Print it, or save it as a template to reuse. Plans are also in your offline copy.

After the game

1. On the game’s page, enter both scores in the **Final score** card and click Save score.
2. Tick **Friendly** for a scrimmage so it doesn’t count toward your record. The Record at the top of the Games tab counts every other scored game.

Need more?

The full New Coach Guide to Lineup Manager covers the roster, guest players, team types, game formats, subs, offline use, practice plans, tournaments, final scores and record, seasons, game film, stats, start history, activity log, and settings in detail.
