

Quick Start Guide to Lineup Manager

Oct 2, 2026 · Jeffrey Haid

The fast path to running your first game in Lineup Manager — for the full walkthrough, see the New Coach Guide.

The essentials

1. **Accept your invite.** Open the email from your club admin and click the invite link. Create an account (or sign in) when prompted.
2. **Pick your club and team.** If you coach more than one team, choose the right one after signing in. If you belong to more than one club, your club's name at the top of the page becomes a switcher so you can hop between them later.
3. **Check your roster.** Your admin may have already added the roster — if not, add players from the Roster tab, or paste in a CSV.

Before every game

1. Open the game from the Games tab, or schedule a new one and pick a **Format** — Field, Sixes, or Sevens (see the New Coach Guide for what each means).
2. On the right, set each player's availability — Available, Maybe, or Not Available.
3. On the left, build the lineup: pick a player for each slot. Only Available/Maybe players show up as choices. The slots shown automatically match the game's Format.
4. Anyone not in a starting slot appears on the Bench below the lineup.
5. Click Print lineup sheet to print or save a PDF copy for game day.
