Install Lineup Manager on your iPhone or iPad

Oct 18, 2026 · Jeffrey Haid

Adding Lineup Manager to your Home Screen gives you an app icon that opens full-screen, with no browser bars — the quickest way to reach your lineups on game day. It takes about 30 seconds and there is nothing to download from the App Store.

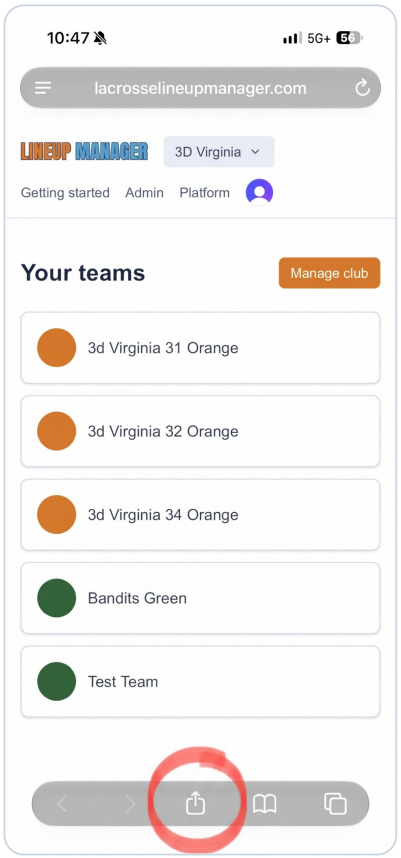

1 Open the site in Safari

Open **Safari** on your iPhone or iPad and go to **lacrosselineupmanager.com**. Sign in if asked, so you land on your teams.

This works from Safari. If you opened the link inside another app (an email or a text message), tap the link's browser or compass icon to open it in Safari first.

2 Tap the Share button

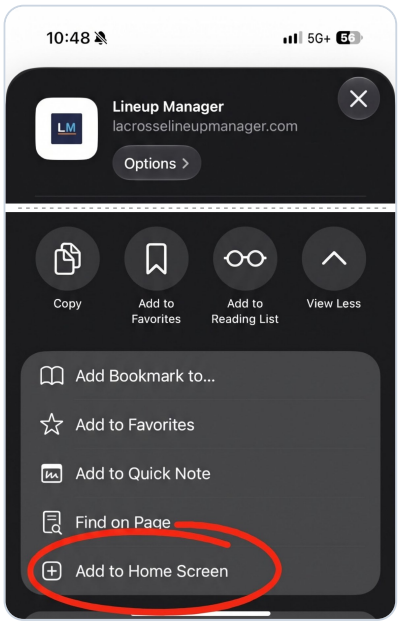

At the bottom of the screen, tap the **Share** button — the square with an arrow pointing up (circled in red in the picture). On an iPad it is at the top right of the screen.

3 Tap "Add to Home Screen"

The Share menu slides up. **Scroll down** through the list of actions (Add Bookmark, Add to Favorites, Add to Quick Note, Find on Page…) until you see **Add to Home Screen** (circled in red), with a plus icon in a square. Tap it.

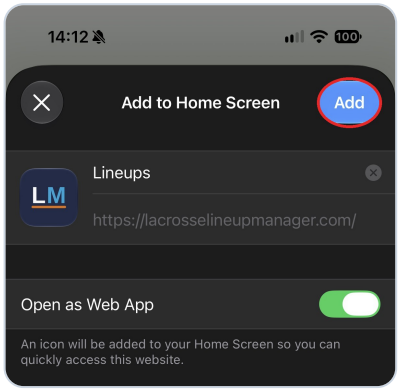

The top of the menu shows the Lineup Manager icon and lacrosselineupmanager.com, so you know you're adding the right site.

4 Tap Add

The **Add to Home Screen** screen opens, showing the app icon, its name — **Lineups** — and the web address. Leave **Open as Web App** switched on (green); that is what makes it open full-screen like an app. Then tap **Add** in the top-right corner.

You can change the name first if you like — tap it and type. The on-screen keyboard appears while you edit the name; tap the blue check key to put it away.

5 Open it from your Home Screen

The Lineup Manager icon (the blue “LM”) now sits on your Home Screen under the name Lineups, like any other app. Tap it any time to open your teams. You can drag it to your first Home Screen page or into a folder.

Tips

- **Don’t see “Add to Home Screen”?** Scroll further down the Share menu — it is below Find on Page. If the menu shows only a few buttons, tap **View More** first.
- **Heading to a field with weak signal?** Open your team once while you have service and tap **Save now** near the bottom of the page. The app then keeps an offline copy of your upcoming games, lineups and availability on your phone. See the Coaches Guide for details.
- **Already installed?** Once the app is on your Home Screen, the install card on the Getting started page disappears.
- **Want to remove it?** Touch and hold the icon, then choose **Remove App**. Your teams and lineups stay safe in your account.
- **Android or Chrome?** Open **Getting started** in the app and tap **Install app**, or use the browser menu (three dots) and choose Install app or Add to Home screen.
